Education

Islamic University Of Lebanon

Bachelor of Science in Computer Science

Sept 2021 – March 2025

Lebanon, South

Relevant Coursework

- | | | | |
|----------------------------|------------------------|----------------------|--------------------------|
| • Internet of Things (IoT) | • Advanced Programming | • Programming | • Calculus |
| • Introduction to Robotics | • Data Structures | • Numerical Analysis | • Web Development |
| • Data Communication | • Object-Oriented | • Probability | • Mobile App Development |
| • Network Fundamentals | | • Linear Algebra | • Database Systems |

Experience

Scary-Byte

Full-Stack Developer

June 2025 – May 2026

Lebanon

- Led the development of the **Pick Lebanon** application for 4 months, owning both front end and backend architecture using **Flutter**, and **Laravel** with a **REST API** backend : [Pick App Link](#).
- Built and maintained core system components for **Hornet Strike**, including the **authentication layer**, **payment gateway integration PayFast**, and **role-based access control (RBAC)** across the platform.
- Collaborated with a team of **4** developers in an **Agile** workflow, using **Git/GitHub** for version control and **code review** to ship features from planning through deployment.

Freelance

Robotics & Programming Instructor | [See Session](#)

2023 – Present

Lebanon

- Taught hands-on **robotics** courses using **Arduino** and **C/C++**, guiding students through several build-and-code projects from circuit design to working prototypes.
- Delivered **programming** courses and workshops, designing curriculum, exercises, and assessment materials (booklets, practice questions with answer keys) for each session.

Projects

ASL-Assist | *Flutter, Angular, Laravel, TensorFlow Lite* | github.com/AhmdELDor/ASL_2024

2024-2025

- Senior project: built a 3-tier platform for the ASL community, a **Flutter** mobile app, **Angular** admin dashboard, and **Laravel REST API** secured with **Sanctum** token authentication.
- Integrated an on-device **TensorFlow Lite** model into the mobile app for real-time hand-sign recognition.
- Designed the relational **MySQL** schema and **Eloquent ORM** models for community features including posts, badges, and scheduled ASL-conducted events, plus an admin dashboard for managing users, content, and statistics.

Bill Management App | *Flutter, Laravel, SQLite, Sanctum* | github.com/AhmdELDor/bill-management-app

2024

- Built a production, offline-first bill-collection system (**Flutter** + **Laravel REST API**) currently deployed for a field-collections business, covering bill generation through payment collection and receipts.
- Designed offline-first **data synchronization** using local **SQLite** caching so field employees can collect payments with no signal, plus **Bluetooth** thermal-printer receipt generation (PDF).
- Implemented **role-based access control** with **Laravel Sanctum**, live revenue/performance analytics dashboards, and automated group billing with prepaid-balance handling.

E-Commerce SaaS Platform | *Laravel, React, TypeScript, MySQL, Cloudflare* | [See Demo](#)

2026

- Built a **multi-tenant** e-commerce platform serving many independent stores from one codebase, each on its own subdomain with fully isolated data and custom theming.
- Engineered **fail-closed tenant scoping**, plan-based feature entitlements and **role-based access control**, plus atomic single-transaction order processing with server-side pricing and stock control.

Towingo Accounting App | *React, TypeScript (PWA), Laravel, PostgreSQL, Docker* | [Try it](#)

2026

- Built an **offline-first PWA** that tracks real cost and profit per item using **FIFO** inventory accounting, syncing automatically once back online.
- Designed a **command-replay sync** architecture for conflict-free multi-device writes

Digital Menu & Ordering Platform | *Laravel, Angular, MySQL, Tailwind, Cloudflare* | [See Demo](#) 2026

- Developed a **white-label SaaS** giving restaurants a QR-friendly digital menu, ordering storefront and admin panel, built on **single-database multi-tenancy**.
- Delivered a bilingual (**Arabic/English**) RTL interface, reusable test-covered action classes, and a **CDN-backed** image pipeline on Cloudflare R2.

Teacher Panel | *React, Vite, Cloudflare Functions, D1 (SQLite), Google OAuth* | [Try it](#) 2026

- Built a class-management app with lesson planning, exam tracking and **Google Calendar/Gmail** sync, deployed as an installable **PWA** on a serverless Cloudflare stack.
- Implemented **incremental multi-device sync** (fetching only changed records) and a full **audit trail** with one-click restore of deleted data.

Technical Skills

Languages: PHP, Dart, Python, Java, JavaScript, C#, C/C++, SQL

Backend: Laravel, Spring Boot, REST API Design, Laravel Sanctum, JWT, OAuth, Eloquent ORM, MVC Architecture

Frontend & Mobile: Flutter, Angular, React, HTML/CSS, State Management (Provider, Bloc)

Databases: MySQL, PostgreSQL, SQLite, Database Design, Migrations, Query Optimization

Tools & DevOps: Git, GitHub, Docker, Postman, Linux, CI/CD, Firebase

Practices: Agile/Scrum, Code Review, Unit Testing, API Integration, Debugging

Productivity & AI Tools: Claude, Claude Code, AI Prompting, Obsidian, Canva, CapCut

Certifications

English Language Certificate 2021

Linguaphone

Lebanon

- Certified proficiency in English language communication.

Introduction to Artificial Intelligence 2026

American University of Beirut

Lebanon

- Certified proficiency in AI prompting and tools.

Claude Code 2026

Anthropic

Lebanon

- Certified proficiency in Claude Code 101 course.
